Professional Experience

Aptean
Senior Manager – Revenue Intelligence & Insights
Alpharetta, GA | Aug 2025 – Feb 2026

Revenue Intelligence Leadership

- Lead a 5-person Revenue Intelligence & Insights team embedded within Sales Operations supporting global revenue reporting and analytics.
- Serve as the strategic analytics partner to RevOps, Finance, Marketing, and executive leadership across pipeline, bookings, and revenue performance.
- Own the enterprise revenue reporting ecosystem supporting board, COO, CMO, and CEO decision-making.

Enterprise Revenue Data Architecture

- Architected a Microsoft Fabric medallion data architecture (Bronze to Silver to Gold), integrating Salesforce, bookings, pipeline, ARR, and marketing data into a governed revenue Lakehouse.
- Designed scalable Lakehouses, semantic models, and data pipelines enabling standardized revenue KPIs and enterprise analytics.

Executive & Board Reporting

- Built executive Power BI dashboards consolidating AOP, quotas, bookings, pipeline, and ARR performance into a unified enterprise reporting environment.
- Improved forecasting transparency across regions and product lines while reducing reporting cycle times.

Enterprise Funnel & Market Intelligence

- Developed analytics spanning the full commercial lifecycle from TAM / SAM / SOM market sizing through MQL, SQL, pipeline, and closed-won revenue.

- Delivered board-ready growth analytics connecting marketing investment and sales performance to revenue outcomes.

Salesforce Revenue Systems Integration

- Led integration of Salesforce opportunity, account, and activity data into the Fabric architecture.
- Standardized revenue reporting logic including closed-won treatment, order segmentation, and renewal classification.

Mill Creek Residential

BI Architect

Atlanta, GA | Jan 2025 – Aug 2025

Enterprise Financial Data Architecture & BI Platform Strategy

- Led a large-scale Vena data archiving initiative, removing 1.5 billion legacy records, reducing model refresh times from 11 hours to 2 hours, which in turn led to a significant acceleration in the financial close cycle.
- Directed management of the REFINE (Real Estate Finance Excellence) initiative, aligning pro forma deal models with live financial reporting for corporate real estate finance.
- Implemented Kanban boards and Weekly Status Reports (WSRs), providing real-time visibility into project deliverables and financial reporting initiatives for executive stakeholders.
- Partnered with finance, FP&A, and investment teams to integrate deal modeling workflows into centralized reporting structures, improving financial governance and data accuracy.
- Designed Power BI reporting architecture integrating with Microsoft Fabric and OneLake to centralize pro forma and live financial datasets and support predictive analytics for CFO-level reporting.

FORTNA

Director, Business Intelligence

Atlanta, GA | Nov 2023 – Oct 2024

Enterprise Business Intelligence Leadership

- Led the enterprise Business Intelligence function supporting financial reporting, operational analytics, and executive decision-making across global operations.
- Directed cross-functional analytics initiatives connecting Finance, Operations, and executive leadership through centralized reporting and data governance.
- Established a global Business Intelligence support function for Power BI and Tableau reporting using Kanban methodology, achieving a 90% ticket resolution rate within a two-week SLA.
- Maintained 100% retention across the Business Intelligence team during a period of rapid platform modernization and analytics expansion.

Enterprise Financial Data Transformation

- Directed the AR/AP financial consolidation initiative, integrating five ERP systems using Vena, cutting reporting times in half, and enabling faster executive decision-making.
- Improved financial visibility enabled early loan repayment, saving the company approximately $40 million in interest expenses.
- Led implementation of Planful to centralize financial consolidation, planning, and budgeting processes, reducing financial close cycles from 15 days to 5 days.
- Architected enterprise Power BI dashboards layered over Fabric-based data architecture, enabling real-time operational and financial analytics across global ERP systems.
- Implemented master data management (MDM) capabilities using BOOMI in alignment with Deloitte's strategic recommendations to improve enterprise data accuracy and reporting consistency.

FORTNA

Manager, Business Intelligence & Data
Jacksonville, FL | Jul 2022 – Oct 2023

Business Intelligence Team Leadership

- Led strategy and operations for the Business Intelligence team responsible for enterprise reporting, analytics, and data-driven decision support across the organization.
- Trained and mentored a 6-person cross-functional BI team, including analysts and interns, building technical capability and establishing a culture of continuous improvement.

Enterprise Reporting & Analytics Platform Development

- Executed the enterprise Power BI and Tableau reporting strategy, automating more than 60 reports and integrating data from project management, ERP, and financial systems.
- Established a Business Intelligence server environment with replication of Microsoft Dynamics AX to enable near real-time financial reporting and improved Salesforce reporting capabilities.
- Implemented Power Automate workflows and reporting automation solutions that reduced manual reporting effort and improved operational efficiency across business teams.

Financial Data & Post-Merger Reporting

- Led documentation and reporting initiatives supporting a $3 billion post-merger financial consolidation, ensuring consistent financial visibility across leadership and operations.

FORTNA
Enterprise Data Architect
Jacksonville, FL | Jan 2021 – Jul 2022

Enterprise Data Architecture

- Architected the enterprise Business Intelligence data platform supporting Power BI and Tableau analytics across operations, finance, and project delivery teams.
- Designed scalable data models and reporting pipelines enabling consistent enterprise KPI definitions and improved reporting performance.

Enterprise Data Integration & Data Warehousing

- Developed SQL-based ETL pipelines integrating ERP, CRM, and operational datasets into centralized reporting structures supporting executive analytics.
- Designed data warehouse schemas enabling enterprise reporting across project financials, operational performance, and customer delivery metrics.

Analytics Platform Enablement

- Implemented Power BI semantic models and reporting frameworks, improving enterprise reporting consistency and enabling self-service analytics across business teams.
- Partnered with business leaders to translate operational reporting needs into scalable enterprise BI solutions.

Early Career – Business Intelligence & Data Architecture Roles
Florida Blue | Kforce | Jackson Hewitt | ACTS | Credit Union One | Exsilio | City of Jacksonville

- Developed enterprise reporting solutions, ETL pipelines, and SQL-based analytics platforms across healthcare, financial services, consulting, and government environments.
- Built Power BI dashboards, data warehouse models, and reporting automation supporting financial analytics, operational reporting, and executive decision-making.
- Gained deep expertise in enterprise BI architecture, data modeling, and large-scale analytics platforms that later supported leadership roles in Business Intelligence and Data Strategy.

Education

Bachelor of Science – Computer and Information Science
University of North Florida
